Objective

To build an application which will help people to try out products like spectacles before buying it.

Progress - Topic area 1

Accomplishment 1

- Using SparkAR, we imposed few spectacles on the test objects .
- Face tracker was used for tracking the eyes and movement.

Accomplishment 2

- Options for changing the color of spectacles of same type were added to the application.

Goals for further development

1. Add the same functionality for clothes, shoes etc.
2. Deploy the application on Facebook and Instagram.
3. Building a portal for prospective sellers who want to incorporate this application on their respective websites.
